

# TIETEX T272 POLYESTER FABRIC

## Technical Data & Application Instructions

**TIETEX T272™** stitchbonded polyester is one of the strongest materials available to the roofing industry for use as reinforcement in cold process roofing.

Stitchbonding offers an unusual combination of high strength properties with good elongation for excellent thermal stress force accommodations.

**TIETEX T272™** is a soft polyester that will readily conform to embedded gravel and standing seam metal roof decks. Recommended roof types include new plywood roofs, some granulized roofs, walk decks or any roofs requiring extensive repairs. **TIETEX T272** is also used as a stabilizer for areas that experience ponding water. It is much easier to handle and apply properly than other soft polyester sheets.

### Sizes Available

- 4" wide x 300' rls.
- 6" wide x 300' rls.
- 12" wide x 300' rls.
- 20" wide x 300' rls.
- 40" wide x 324' rls.
